PROCESS, treatment and education for colorectal cancer:
Angiogenesis Inhibitors as a New Class of Anticancer Drugs

SDSU Campus, University Student Union, Room 262 in Brookings, SD

PROGRAM PURPOSE:

Through our education program, we will disseminate the process of angiogenesis, the potential targets for inhibition, agents currently in clinical trials, and the use of bevacizumab in colorectal cancer treatment. Additionally, we will explore the epidemiology of colorectal cancer while identifying the primary risk factors and stages of the disease. Lastly, the program participants will be given effective prevention practices for increased patient education and adherence.

Our target audience is clinical, retail and hospital pharmacists, physicians, physician assistants, nurses, nurse practitioners along with other allied health professionals interested in colorectal cancer treatment and education.

ACCREDITATION:

For attending this program, 2 contact hours (0.2 CEUs) will be awarded and a statement of credit provided within 60 days upon receipt of the attendance verification form. UPN: 063-000-07-012-L01

South Dakota State University College of Pharmacy is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education.

PRESENTERS:

Teresa Seefeldt, Pharm.D.
Assistant Professor and Research Assistant, Department of Pharmaceutical Sciences, South Dakota State University College of Pharmacy, Brookings SD

Joe Weber, Pharm.D.
Clinical Pharmacist at Sanford Clinic Oncology Pharmacy, Sioux Falls, SD

PROGRAM OBJECTIVES:

- 1. Explain the process of angiogenesis and its role in the cancer development.
- 2. Identify the potential targets in the angiogenesis pathway for the development of anticancer agents.
- 3. Describe the pharmacology of bevacizumab and other related drugs, and their role in cancer treatment.
- 4. Evaluate the epidemiology of colon cancer in the U.S.
- 5. Identify the primary risk factors for colon cancer.
- 6. Identify the stages (progression) of colon cancer.
- 7. Outline treatment options including the mechanisms of action, adverse effects, drug interactions and benefits/limitations of the drugs discussed.
- 8. Recognize effective patient education information that would help lower risk for colon cancer by early prevention practices.

PROGRAM AGENDA:

2:00 PM	Welcome, Topic and Speaker Introduction
2:05 PM	Angiogenesis Inhibitors: New Class of Anticancer Drugs
2:50 PM	Questions and Answers
3:00 PM	Process, Treatment and Education for Colorectal Cancer
3:50 PM	Question & Answer, Evaluation/Quiz
4:00 PM	Closing Remarks and Adjournment
